

PLANNINGMANAGER for Exact Macola

Satisfy your customers with agile planning...

Planning and scheduling are major challenges for many organizations. The variables within the processes can make or break a company. Unsatisfactory production planning leads to high operating costs and a potential loss.

Planning Manager for Exact Macola is a powerful, advanced planning and scheduling solution that empowers manufacturers to quickly create, update and share flexible and reliable production plans. This module enables organizations to generate accurate schedules that consider constraints around people, machines, tooling and materials. Manufacturers are then able to ensure they make best use of their available capacity to deliver to customers faster and in the most cost-effective way.

Making use of latest technologies, it features an intuitive visual planning board with extensive online views making it easy for you and your team to gain visibility over any stage of the process, from any device.

“Planning Manager is a significant part of our new production planning process. This has been a great product for us and an excellent investment that maximizes the productivity of our MS / MRP system.”

FACTS

Integration

Planning Manager integrates with your Exact Macola package, Workforce Manager and Factory Manager to provide you with a 360 view of your production. Planning Manager simplifies your production planning and scheduling, enabling you to create efficient job routings, manage materials availability and publish your plans online for full company-wide visibility.

Planning Manager is one of LYNO’s 3 innovative solutions, that work together seamlessly to help you compete in today’s market.
